

Junior Operations Engineer

We are a sustainable infrastructure company with a majority of our business in renewable energy assets. We complement our portfolio of renewable assets with storage, efficient natural gas and transmission infrastructure assets, as enablers of the transition towards a clean energy mix. We are also present in water infrastructure assets, a sector at the core of sustainable development.

Our purpose is to support the transition towards a more sustainable world by investing in and managing sustainable infrastructure, while creating long-term value for our investors and the rest of our stakeholders.

We currently own or have an interest in a portfolio of diversified assets in terms of business sector and geographic footprint. Our portfolio consists of 40 assets with 2,048 MW of aggregate renewable energy installed generation capacity (of which approximately 72% is solar), 343 MW of efficient natural gas-fired power generation capacity, 55MWh of district heating capacity, 1,229 miles of electric transmission lines and 17.5 M ft³ per day of water desalination.

We own and manage operating facilities throughout the North America, South America and EMEA regions. More specifically, in the Kingdom of Spain we have eight solar energy facilities located throughout the country.

We are currently seeking for a **Junior Operations Engineer** to work with and strengthen our **Operations** team based in **Seville's** office.

To apply, please send a mail with your **CV** and application to **gustavo.carballeda@atlantica.com**

Responsibilities

- Online monitoring and daily follow-up of technical performance of the assets.
- Follow up and analysis of assets key performance indicators.
- Review of the asset's operation and maintenance reports.
- Elaboration of technical reports to Management.
- Technical support to asset managers.
- Data analysis to root cause reports

Education

- Bachelor's degree or higher in Industrial Engineering.
- Master's degree in renewable energies is desirable.
- Excellent English language skills (written and speaking) C1 level is a must.
- Thermodynamics (energy cycles, Rankine, Brayton, etc.), Photovoltaic energy, and fluid dynamic energies know-how and knowledge.

Personal Skills

- Problem solving and strong analytical skills.

- Great communication skills-both oral and written-.
- Adaptability, flexibility, and the ability to do the right thing under pressure and tight deadlines.
- Proactiveness with the task and solutions.

Technical Qualifications

- **Experience of 1** years or more as an operations engineer in the renewable energy sector.
- Proficiency in Microsoft Office programs (advanced Excel is a must).
- Proven experience with programming languages (VBA, Python, etc.)

Benefits

- Competitive remuneration package.
- Growth opportunities in a promising and booming industry.
- A highly committed, dynamic, and challenging environment.
