

UNIVERSITY OF ALGARVE PRESENTS

IT SOLUTIONS FOR THE OCEAN CHALLENGES

Face-to-face event

Event Overview

Date and time: 14th June 2022

Location: University of Algarve, Portugal
(Presential, Campus Penha)

You will have contact with experienced companies in Software Solutions, in activities in the Maritime/Marine sector and in Ocean Data productions. Methods to merge these expertise into integrated solutions will be discussed.

**IF YOU ARE
PASSIONATE
ABOUT THE OCEAN
AND SUSTAINABLE
BLUE-TECH
SOLUTION, THIS
EVENT IS FOR YOU!**

Goal of the event

The objective of the event is to bring together IT companies and oceanographic data providers to exchange experiences and develop information systems for the blue economy.

The idea is to capitalize on the scientific data produced in the context of operational oceanography (Observation and models) to use it for activities related to the blue economy such as fishing, aquaculture, shipbuilding, nautical and coastal tourism, among others.

The final goal is to connect IT companies and scientific data developers in order to create online interfaces for new products that will benefit such coastal activities.

Types of participation

Interested in attending?

Discover new technology, meet industry leaders and grow your business capabilities all under one roof.

Thinking about presenting?

Promote your company's innovative products and services by taking your place.
