

MVSEO DE HISTORIA DE LA FARMACIA

“The pharmacy”

The pharmacy profession has on the table an important piece, sometimes with mortars, scales, weights and incorporating the cash register in time. It was the nerve center, used to be of significant size, sometimes made of carved wood, from which the pharmacist attended the public.

Separate, but connected to it by a door, there was the office of the pharmacist with the official books, and also the "rebotica"
